NEBAT TAHA

Toronto, ON | (437) 234-3223 | nebatn@gmail.com| LinkedIn| GitHub | Portfolio

PROFESSIONAL SUMMARY

Cloud and DevOps Engineer with over 15 years of IT experience spanning system administration, networking, database administration, software development, cloud infrastructure, and nearly 2 years of hands-on DevOps experience. Experienced in infrastructure as code, automation, CI/CD, multi-region cloud architecture, and operational observability using AWS, Terraform, Ansible, and GitHub Actions. Hands-on experience implementing GitOps workflows with Kubernetes and Argo CD, with emerging expertise in agentic AI and DevOps orchestration. Brings a strong enterprise infrastructure foundation to modern cloud environments, with a focus on reliability, automation, scalability, and operational excellence.

CORE TECHNICAL SKILLS

Cloud Platforms: AWS, Azure, Oracle Cloud Infrastructure (OCI)
Automation & IaC: Terraform, Ansible
DevOps & CI/CD: GitHub Actions, GitLab, GitHub
GitOps & Containers: Kubernetes, Argo CD, Kustomize, Docker
Monitoring & Observability: CloudWatch, Grafana, Prometheus, Python Exporters
Scripting: Python, Bash
Security & Compliance: RBAC, IAM Policies, AWS Secret Manager, TFsec, Checkov, System Hardening
Systems & Virtualization: Linux (Red Hat, Oracle), VMware, Hyper-V, Oracle VM, Windows Server, Active Directory
System Architecture: High Availability, Fault Tolerance, Multi-Region Architecture
Database Administration: Backup, Recovery, Report Generation
Emerging Technologies: Agentic AI, DevOps Orchestration

PROFESSIONAL EXPERIENCE

Savi Finance: https://financesavi.com/
A finance platform designed to simplify financial management and planning — Toronto, ON
DevOps Engineer — **Oct 2024 – Present**

- Designed and implemented modular, multi-region infrastructure automation using Terraform and GitHub Actions for standardized provisioning, integrating tfsec and Checkov for shift-left security and compliance.
- Developed and maintained Ansible playbooks and roles for multi-region configuration management, with GitHub Actions orchestrating playbook execution using OIDC-authenticated AWS access for post-provisioning and operational tasks.
- Implemented comprehensive monitoring and alerting using Grafana and Prometheus, establishing custom dashboards, alarms, and notifications to proactively track infrastructure and application metrics.
- Automated multi-cloud backup and recovery workflows using Ansible and GitHub Actions, enabling secure backups from AWS environments to Backblaze cloud storage and supporting tested restoration procedures.
- Developing an agentic DevOps orchestration workflow that processes Jira requests, gathers codebase context through repository-read tools, generates code changes, and creates pull requests for human review; expanding the workflow to improve integration, reliability, and evaluation of agent output.
- Collaborated with cross-functional teams to align infrastructure design with business objectives, fostering operational excellence and reliable application delivery.

Professional Development & Relocation — **Canada, May 2023 -Sep 2024**

- Completed the Cloud Computing Connections program with hands-on AWS training from Amazon and Agile methodologies through ACCES Employment, while earning Oracle Cloud Infrastructure certifications and expanding practical skills in cloud infrastructure design, deployment, and management.

ZamZam Bank: https://zamzambank.com/
A customer focused commercial bank established in 2021, aspiring to be the Leading All-Inclusive Bank in Africa
Lead System Administrator — **Ethiopia, Jan 2021 – May 2023**

- Led end-to-end infrastructure design and implementation projects, including evaluating new computing, storage, and networking solutions, ensuring scalability and high availability to support the bank's launch.

- Designed and deployed a high-availability system architecture, leveraging SCCM and Oracle VM (OVM) to ensure seamless and secure access to critical business systems like Active Directory and SharePoint.
- Led the technical implementation of the SWIFT Alliance Lite 2 system, a critical international money transfer system, managing installation and performance monitoring to ensure optimal efficiency and compliance.
- Directed a team of 15 technical professionals, fostering collaboration between business and vendor teams to achieve key milestones for the bank's CORE and digital banking systems, which contributed to an industry award at the 2022 IBS Global FinTech Innovation Awards
- Developed and executed a five-year IT roadmap and functional strategies in collaboration with the executive strategy team, driving technological advancements and aligning IT with core business objectives.

National Bank of Ethiopia: https://nbe.gov.et/

The Central Bank of Ethiopia ensures monetary stability and promotes a secure financial system. **Ethiopia**

Senior System Administrator **Aug 2016 – Dec 2020**

- Directed critical infrastructure migrations and modernizations, including upgrading legacy systems to modern virtualized platforms (VMware, Hyper-V, OVM) ensuring minimal downtime and high availability
- Managed enterprise-level server infrastructure, providing advanced troubleshooting and optimization using SCCM and vCenter to ensure pe ak performance and robust security.
- Monitored and maintained server hardware health using tools like iDRAC, ensuring high availability and reliability for critical infrastructure.

Network Administrator **Aug 2014 – Aug 2016**

- Configured and managed switches, routers, and access controls on firewalls; monitored and troubleshot network infrastructure for optimized performance and security

Database Administrator **Sep 2013 – May 2014**

- Maintained data availability through daily backups, recovery testing, and report generation via database queries, preserving data integrity and accessibility

System Developer **Oct 2010 – Sep 2013**

- Collected business requirements, developed applications, and conducted system testing to identify bugs, implement enhancements, and maintain alignment with business objectives

SELECTED PROJECTS

- **Git-Driven Observability** — Built an automated observability platform using custom Python exporters for focused metrics collection and tag-driven dynamic discovery of AWS resources. View Project
- **Multi-Region Infrastructure Automation** — Built modular Terraform infrastructure with region-scoped deployments, federated OIDC authentication, and automated drift detection. View Project
- **GitOps Continuous Delivery** — Implemented an end-to-end GitOps workflow for automated application delivery, versioning, deployment approvals, and Kubernetes self-healing. View Project

EDUCATION

DevOps, In Progress —University of Toronto – School of Continuing Studies, Toronto, ON | **Apr 2026 – Apr 2027**

Master of Science in Software Engineering — HiLCoE School of Science and Technology, Ethiopia | 2016

- **WES Canadian Equivalency:** Bachelor's Degree (Four Years)

Bachelor of Science in Computer Science — Mekelle University, Ethiopia | 2010

- **WES Canadian Equivalency:** Bachelor's Degree (Three Years)

CERTIFICATES & TRAINING

- AWS Certified Solutions Architect – Associate — Amazon Web Services | **2025**
- Oracle Cloud Infrastructure Architect Associate — Oracle | **2023**
- Oracle Cloud Infrastructure Multi-Cloud Architect — Oracle | **2023**
- Microsoft Certified Solutions Expert (MCSE): Core Infrastructure — Microsoft | **2020**
- Microsoft Certified Solutions Expert (MCSE): Cloud Platform and Infrastructure — Microsoft | **2018**
- Microsoft Specialist: Server Virtualization with Windows Server Hyper-V and System Center — Microsoft | **2017**
